Our premium drawer boxes are assembled with solid maple sides using quality dovetailed joints at each corner, a mark of fine crafted furniture for hundreds of years.

Kabinart's signature series cabinets are solid wood throughout. The rails and center panel are solid and not veneered. Many companies today use veneered center panels.

Kabinart is one of the few rare companies that use plywood as a 'standard' feature in their construction. When many companies want hundreds and thousands more, Kabinart gives this to you free. It's not an option.
